- S3 Bucket
- Cloudinary
- Node mailer
- Oauth 2.0
- Multer

HOSTING / DEPLOYMENT / CLOUD

- AWS
- GLITCH
- VERCEL
- NETLIFY
- HOSTINGER

VERSION CONTROL & TESTING

- GIT
- GitHub
- Postman

KNOWLEDGE IN:

- Data Structures & Algorithms
- MVC Architecture
- Handlebars
- Embedded JavaScript
- PHP
- C
- JAVA
- Figma
- Canva
- Nginx
- Socket.io
- WebRTC
- JWT
- NPM Package

> JOB-SECTOR: A Freelancers site

- Using this platform, freelancers can find jobs and people can hire on contract basis.

-This project has features like wallets, job management, payments, notifications, user management, chat, video call and many more.

- Uses socket.io for real-time chat and webrtc for real-time video call.

Front-End: React, Redux, CSS, Tailwind, JS, Axios

Back-End: Nodejs, ExpressJS

Database: MongoDB

Used: Multer, Cloudinary, Node Mailer, JWT, Google Authentication, Socket.io, Webrtc

Git Repo: Client-Side Repo, Server-Side Repo

MINI PROJECTS

> Netflix Clone

- A Netflix clone application built on React, with category wise classification and video previews sourced from YouTube

API Integration: The Movie DB (TMDB)

Git Repo: https://github.com/thenamevishnu/NetFlix-Clone

> OLX Clone

- A clone of OLX web app using React and Firebase, users can add products with images

Git Repo: https://github.com/thenamevishnu/olx-clone

> User Management

- A user management site, users can update their profile picture and admin can manage users.

Tech Stack: React, CSS, Multer, JWT Authentication

Git Repo: Client-Side Repo, Server-Side Repo
